Art Unit: 2852

1. This application contains claims directed to the following patentably distinct species of the claimed invention.

- I. a waste bin configuration – figures 1B and 2A-2J
- II. a media guide – figures 3A, 3C and 3D
- III. activating apparatus to detect door closure – figures 3E and 3F
- IV. guide and attachment of a waste bin into a printer – figures 4A, 4B, 11-15F
- V. mounts for attaching a waste bin to a hopper – figures 5A-9B
- VI. structure that prevents overlapping of circuit boards – figures 10A-10C
- VII. apparatus that generates electrical signals to activate a printer and enabling the identification of printer families – figures 16A-16I
- VIII. circuit board mounting pads on a cartridge – figures 17B and 17D.
- IX. electrical connections of circuit boards – figures 17A, 17C, 17F and 17G
- X. label for providing instructions on a cartridge – figure 17E
- XI. a shutter for a cartridge – figure 18B

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2852

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
